(54) PORTABLE RADIO EQUIPMENT

(57)Abstract:

PROBLEM TO BE SOLVED: To provide portable radio equipment, the user of which can arbitrary set display contents on a second display which has a small size as compared with a first display.

SOLUTION: When the user wants to change to contents displayed on the second display, the user first selects 'menu' while the user confirms a waiting picture A displayed on the first display and then selects 'sub-picture display selection' from a menu picture B to be displayed next. Consequently, a 'sub-picture display selection' picture D is displayed on the first display. The user sets an item to be displayed on the second display in the picture D by selecting the item and pressing a decision key. When the item is set, '*' mark is added to the item to be displayed. When the user adds the '*' mark to each of all items to be displayed on the second display, the user operates 'setting end'. When the user operates 'setting end', the set items are displayed on the second display.
